

Empowering Tomorrow's Engineers: Building Identity and Competence in Gen Z

dr. Sofie Craps

KU Leuven, Faculty of Engineering Technology

EUCEET Conference, Budapest, 16.10.2028

BME

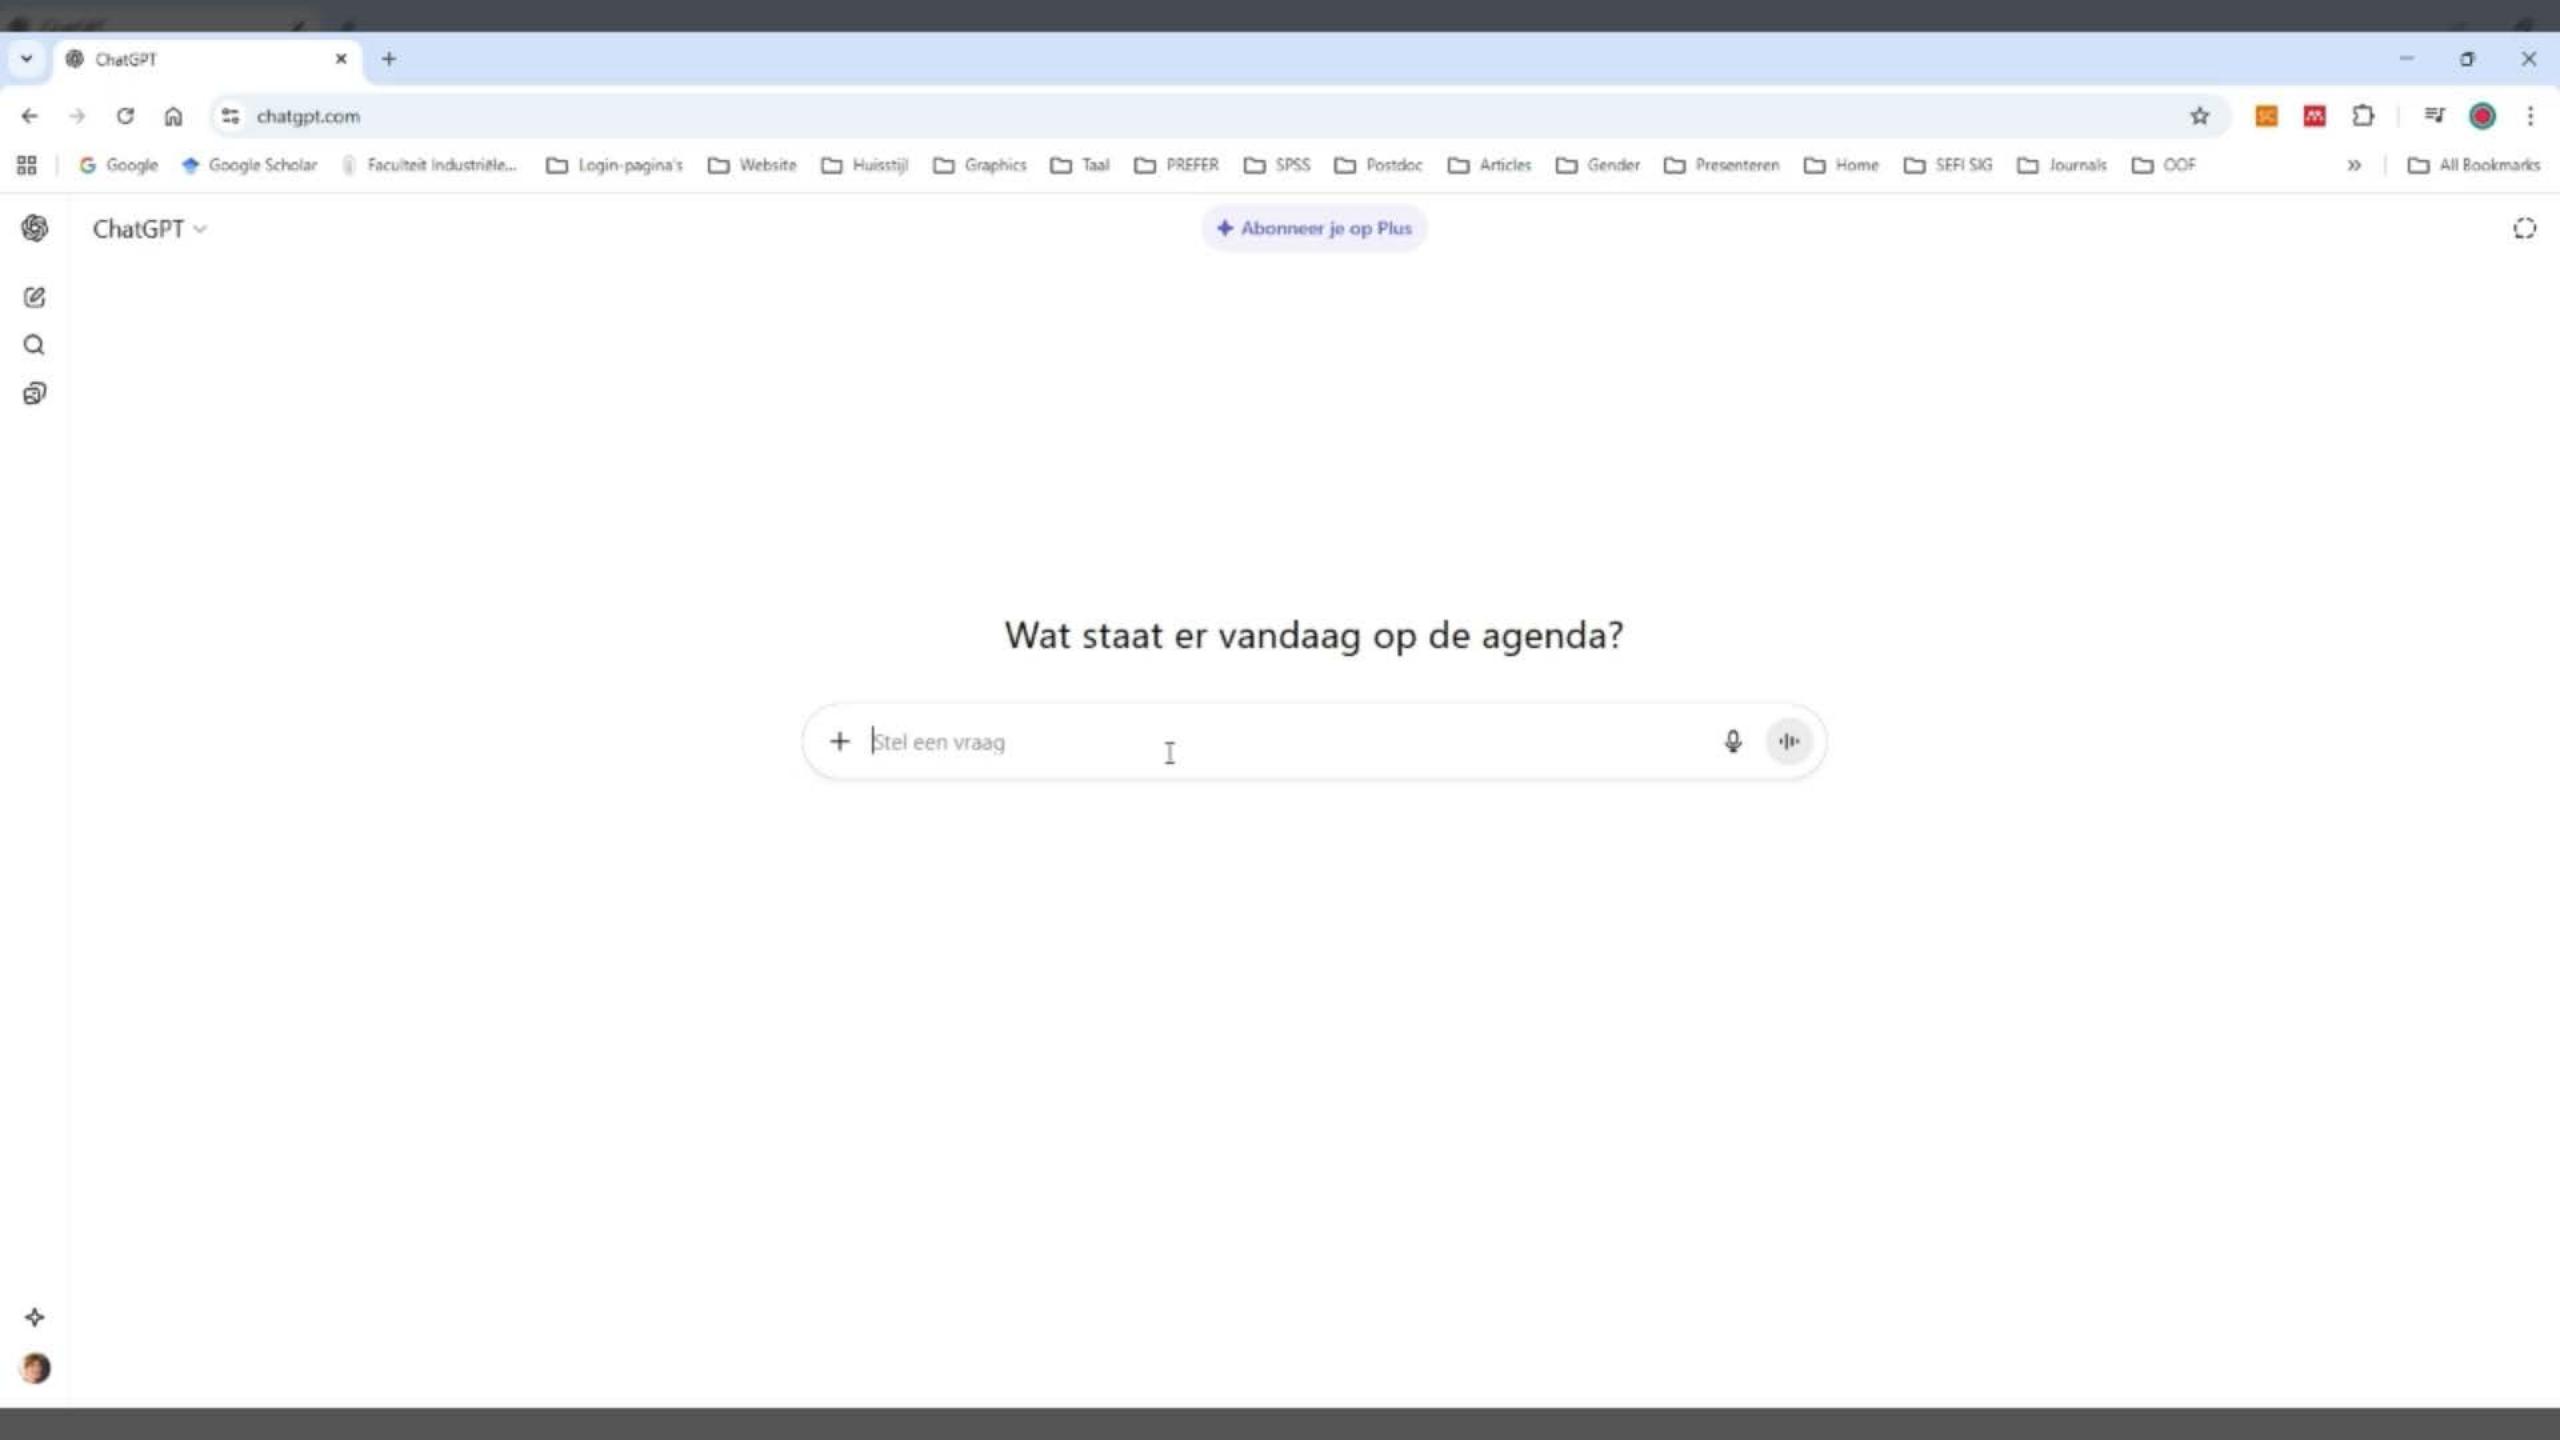

ELTE
SFA
Euro
Univ

Let's talk about...

- Who is Gen Z? (and why does it matter for engineering education?)
- Why engineering identity?
- How to enhance students' engineering identity
- ... and increase attractiveness and diversity in engineering

Who is Gen Z? (and why does it matter for engineering education?)

Wat staat er vandaag op de agenda?

+ Stel een vraag

Gen Z

Who is Gen Z?

Digital natives

Socially aware

Purpose-driven

“Gen Z seeks education that goes beyond theory, addressing topics like sustainability, equity, and social impact.”

Quote: <https://www.goodcourse.co/post/teaching-gen-z-rethinking-education-for-a-new-generation>

... and education

Who is Gen Z?

Digital natives

Socially aware

Purpose-driven

Why it matters for education?

Technology enhanced

Inclusive and flexible

Relevant to real-world challenges

A wide-angle photograph of a grand, ornate building, likely a town hall or church, with a tall, decorated spire and a clock tower. The building features a dark, multi-tiered roof with intricate gables and a facade with many windows and decorative elements. In the foreground, four people are sitting on a set of wide stone steps: a woman with long dark hair, a man with dark skin and short hair, a man with red hair, and a woman with blonde hair. They are all looking towards the right. The sky is blue with scattered white clouds.

Some context first...

Inspiring the outstanding

KU LEUVEN

LEUVEN EDUCATIONAL
RESEARCH INSTITUTE

A photograph of four students walking away from the camera through a university hallway. The hallway features white walls, large arched windows, and a polished floor. The students are dressed casually: a black man in a white t-shirt and jeans, a blonde woman in a striped top and jeans, a white man in a blue shirt and jeans, and a white woman in a white blouse and jeans. They are all carrying backpacks or bags. The scene is well-lit by natural light coming from the windows.

Why engineering identity?

Engineering in Flanders (Belgium)

- Graduated in 2023 (N=1006)
 - 65% are employed in a company (+5% contract)
 - 14% start a PhD
 - 7% continue studying
 - 2% start their own company
- Main sectors
 - chemistry and pharmacy (13%)
 - construction (12%)
 - electronics and tech industry (12%)
- Main functions
 - production/processes (15%)
 - consultancy (15%)
 - research and development (13%)

(ie-net 2023)

wake up call...

1 on 5

engineers change job
before the age of 26.

(more than half of them
within the first year)

N=1930

#1

Job content
(60%)

#2

opportunities
(35%)

#3

Higher salary
(29%)

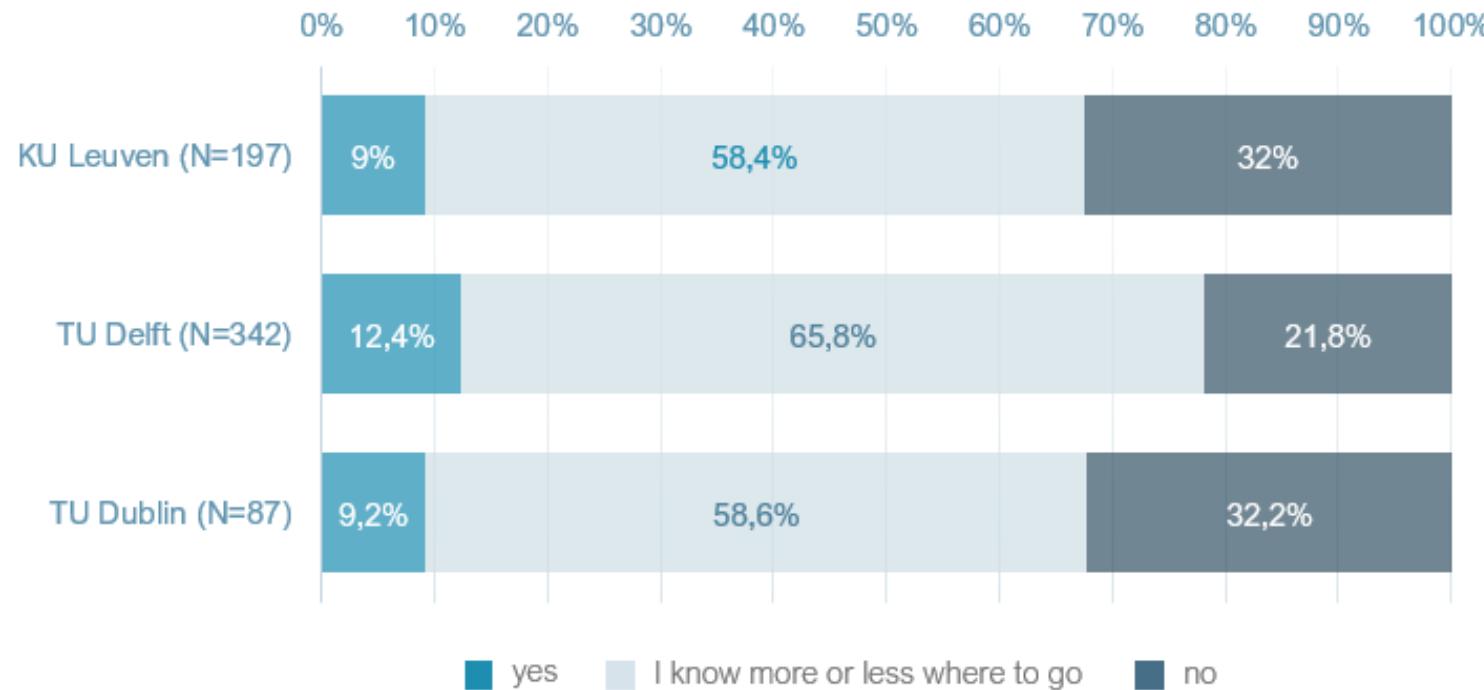

#4

Working in a
larger company
(16%)

KU Leuven, UAntwerpen, UGent, UHasselt & VUB (2016). Report Engineer 2020.

Students' perception of their future self

Do you have a clear picture of your professional future?

(Saunders-Smits et al. 2021)

“

During the **internship** in the final Bachelor year, I discovered that being a project leader is nothing like I expected. **I panicked**. Shit, did I choose the wrong education?

Toon,
graduated in civil engineering

“

As a student, I never found out what opportunities you have in engineering. The only image of an engineer I had was the **image of a technical engineer**: someone who designs or optimizes a machine. But that is only one of the many options. **I realised that only after I graduated.**

Evy,
graduated in electromechanical engineering

Students with a higher score in engineering identity-related measurement are more likely to persist in studying engineering and/or work as engineers after graduation.

(Cannaerts et al., in review; Choe & Borrego, 2020; Verdín, 2021)

A photograph of two female engineers at a construction site. They are wearing yellow hard hats and high-visibility safety vests (one green, one orange). They are both wearing plaid shirts and jeans. They are facing each other and giving a high-five. In the background, there are large construction cranes and a building under construction. The sky is clear and blue.

How to enhance students' engineering identity?

Engineering identity

Engineering identity = ways in which students describe themselves and are positioned by others in the role of being ‘an engineer’

(Godwin & Kirn, 2020)

Interest

The enjoyment and fulfilment of studying/being an engineer(ing)

External recognition

The extent that people in their environment see the student as an engineer

Performance

Students’ belief to perform well in engineering (programmes)

Engineering identity

Engineering identity = ways in which students describe themselves and are positioned by others in the role of being ‘an engineer’

(Godwin & Kirn, 2020)

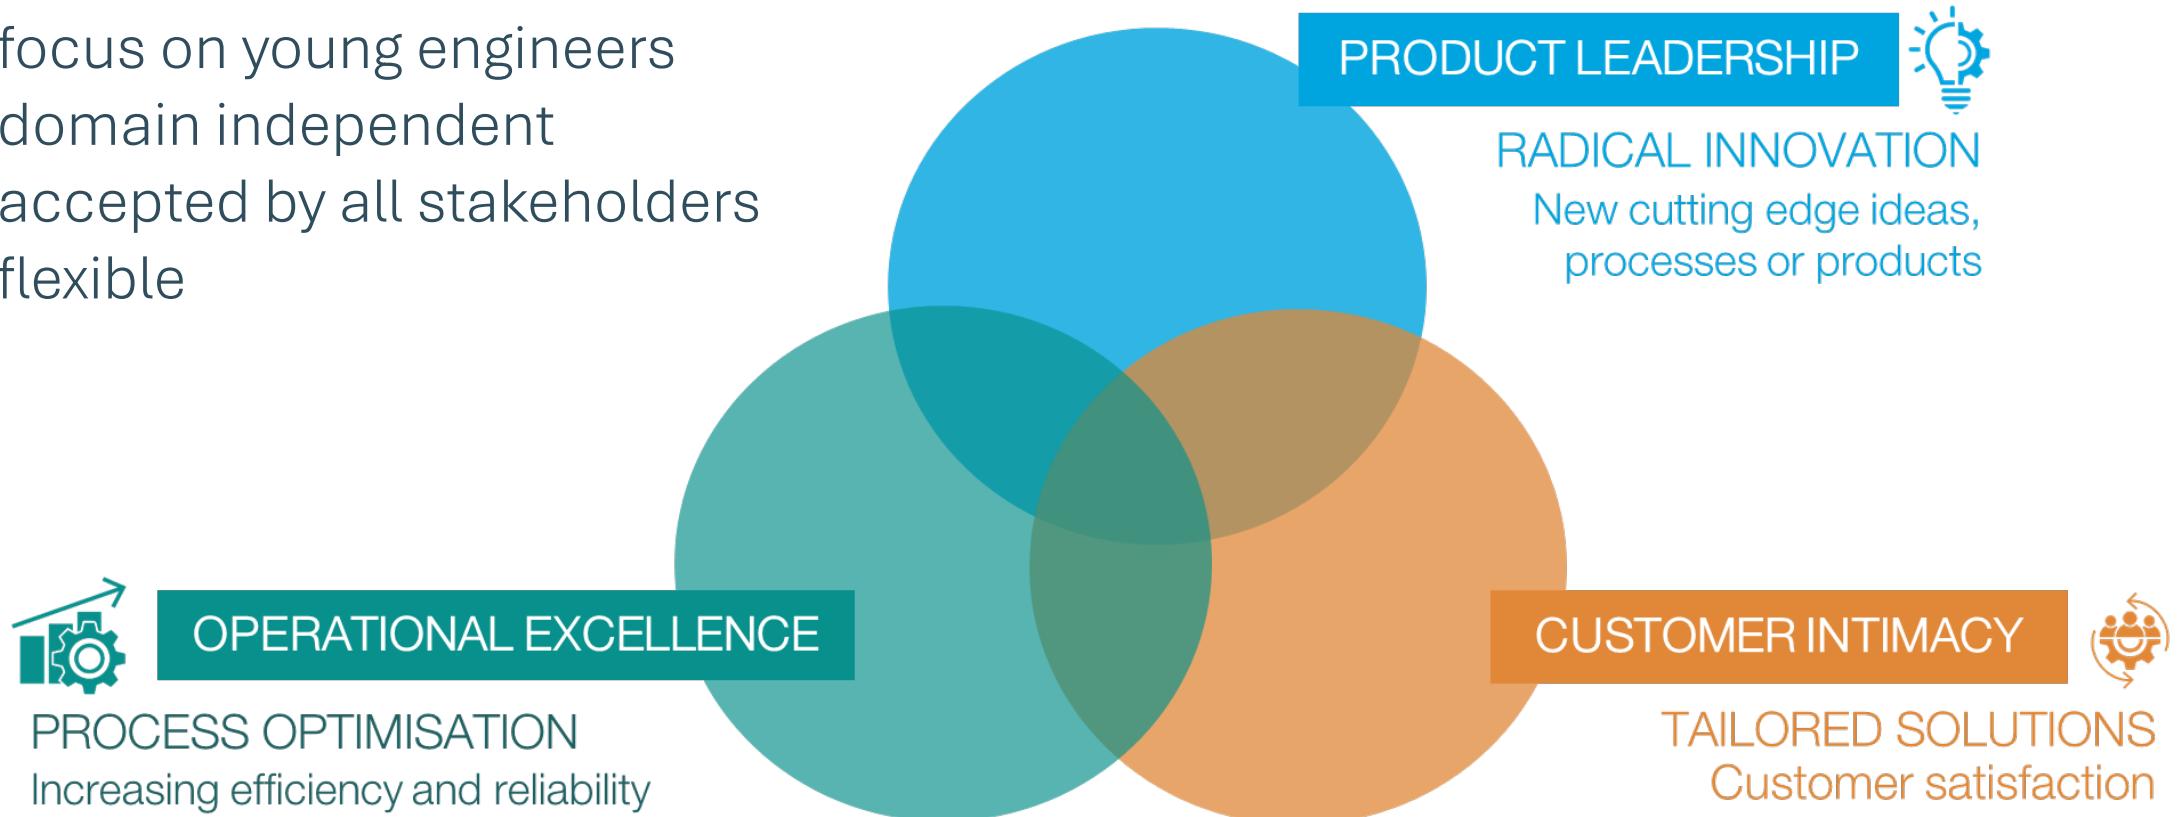

Professional role = an interpretation of an (engineering) position based on expectations of the environment (the work field in this case).

(Craps et al., 2020)

PREFER model

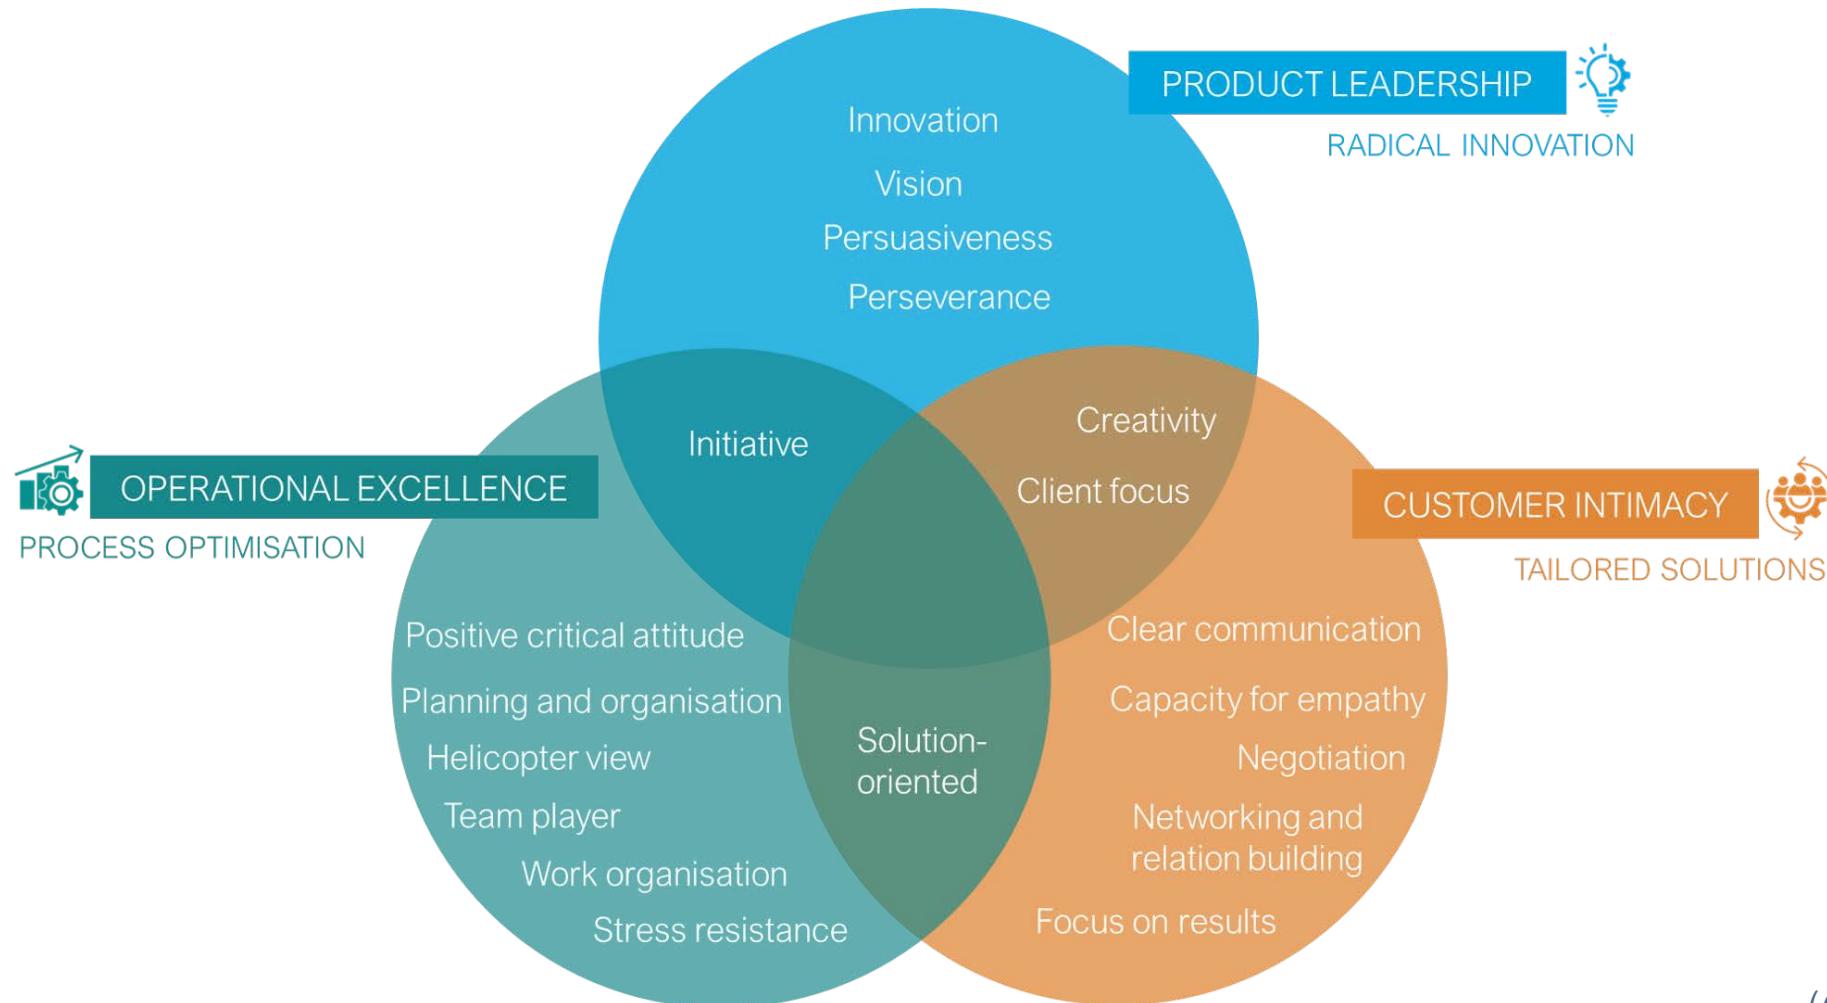

Constraints:

- focus on young engineers
- domain independent
- accepted by all stakeholders
- flexible

(Craps et al., 2020)

PREFER model

(Craps et al., 2021)

PREFER tests

What role(s) do I prefer?

Motivation

PREFER Explore

- › 10 questions
- › Rank most to least preferred option
- › No wrong answers
- › 5 minutes
- › Feedback on **role preference**

Do my existing skills match my preferred role?

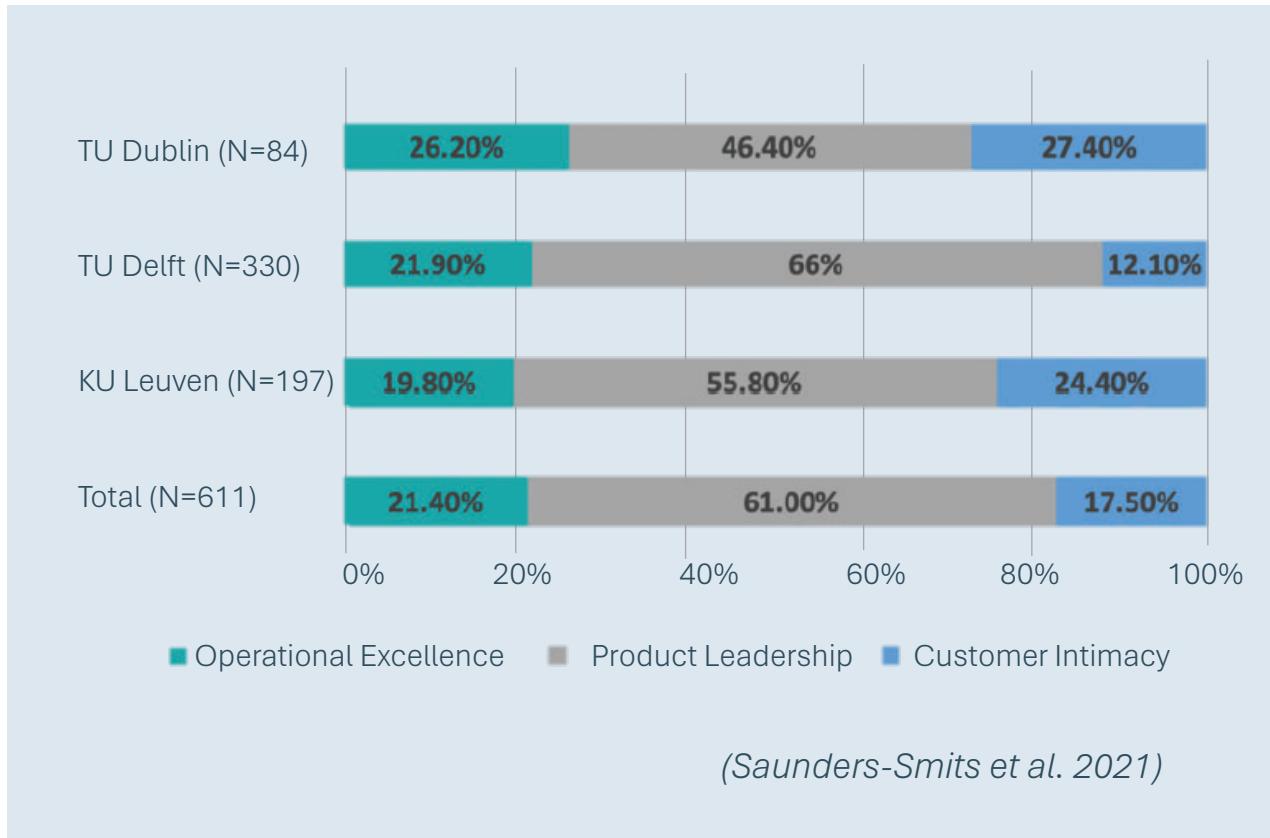

Competencies

PREFER Match

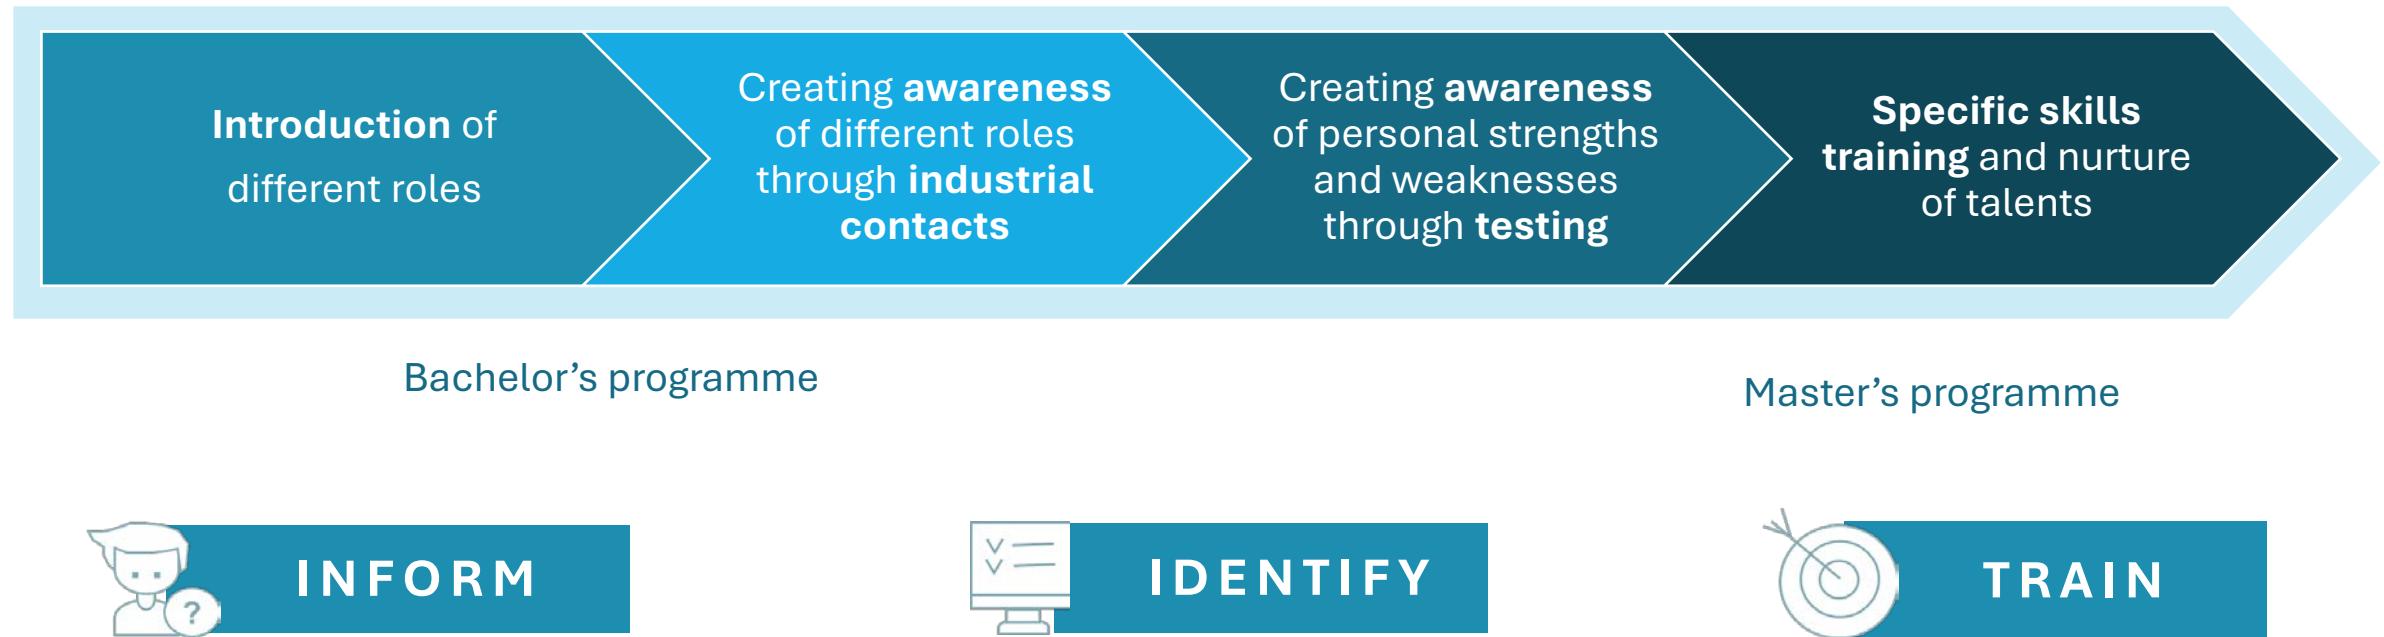

- › 1 situational judgements test/rol (7-8 professional cases/test)
- › Wrong and correct answers
- › 10 à 15 minutes
- › Feedback on **role alignment and competencies**

What did we notice?

Role preference of first-year (engineering) students

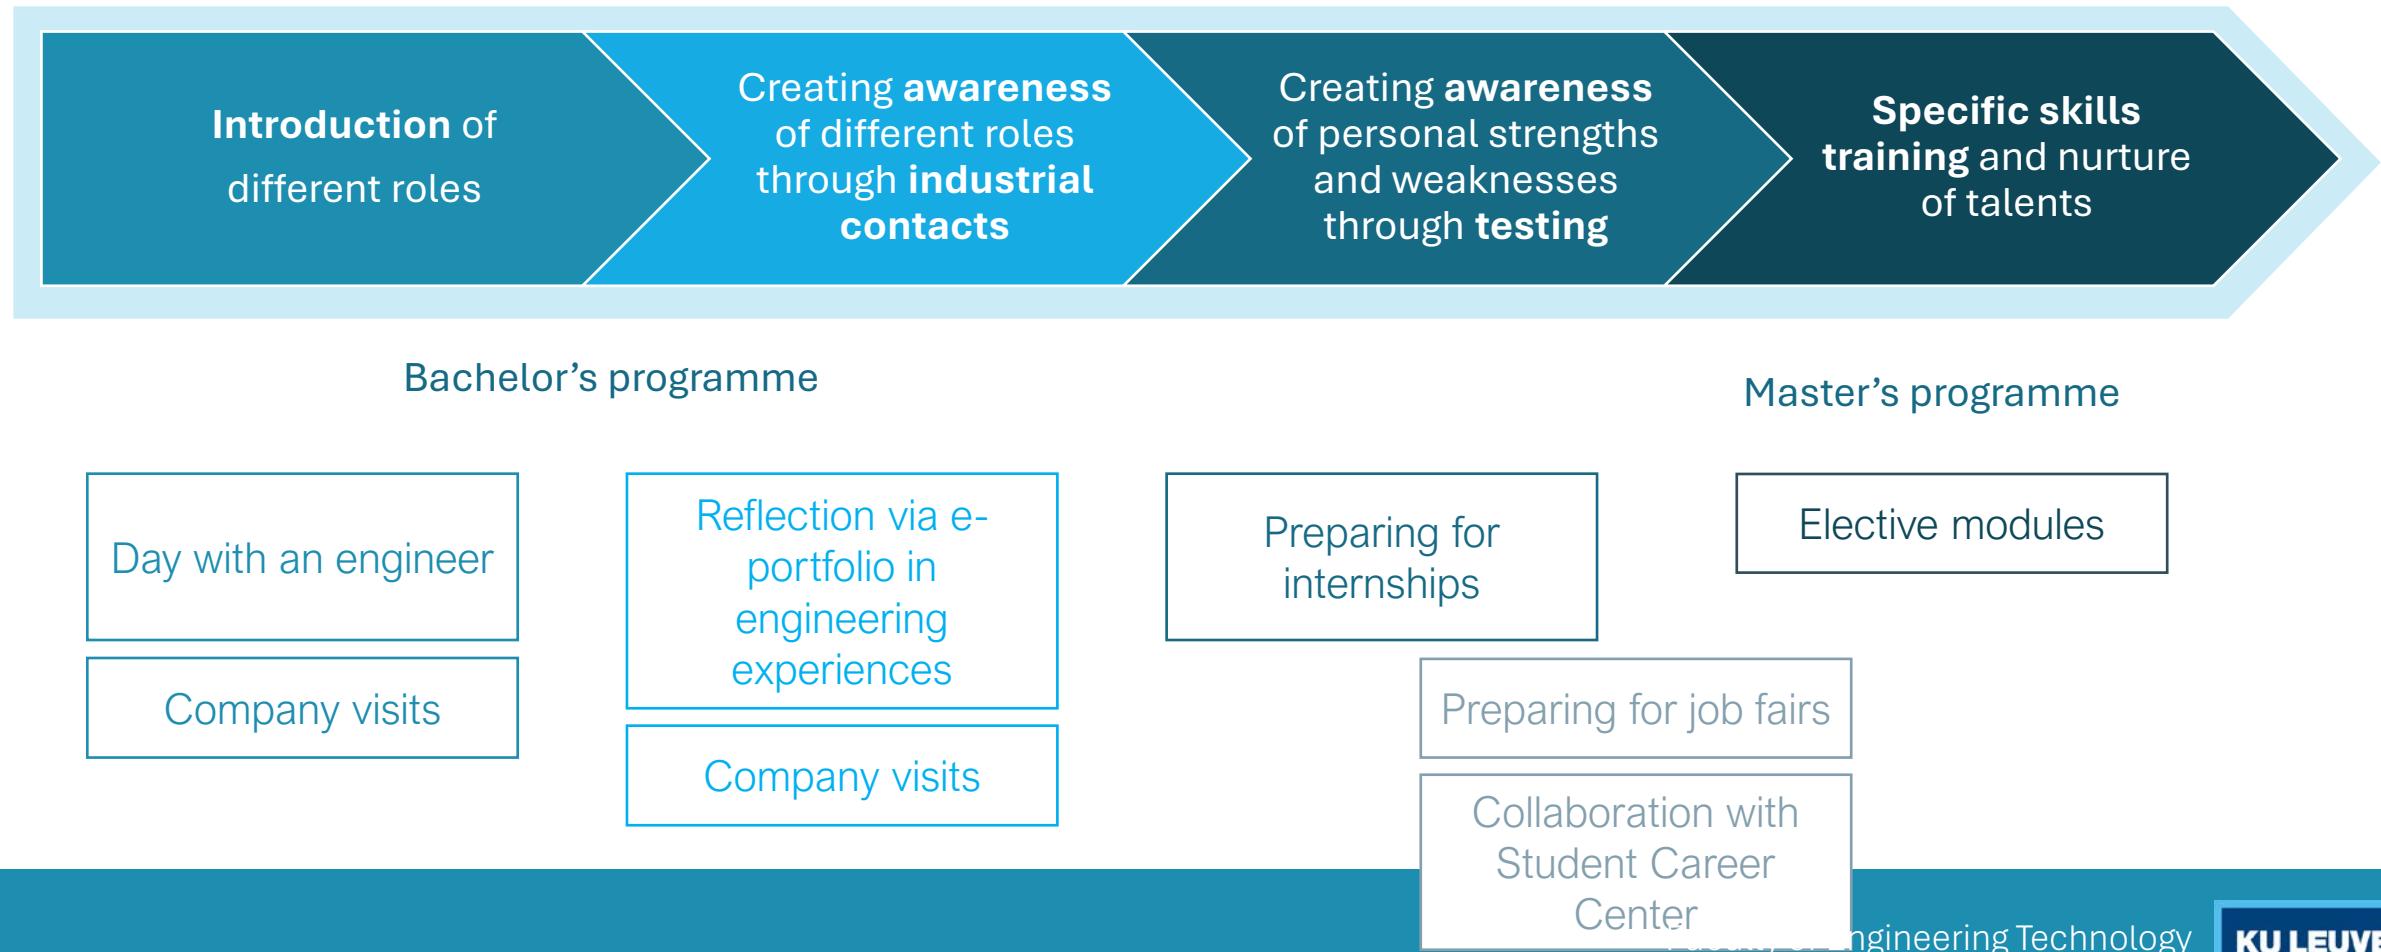

Curriculum implementation in different stages

(Lange & Craps, 2020)

Curriculum implementation in different stages

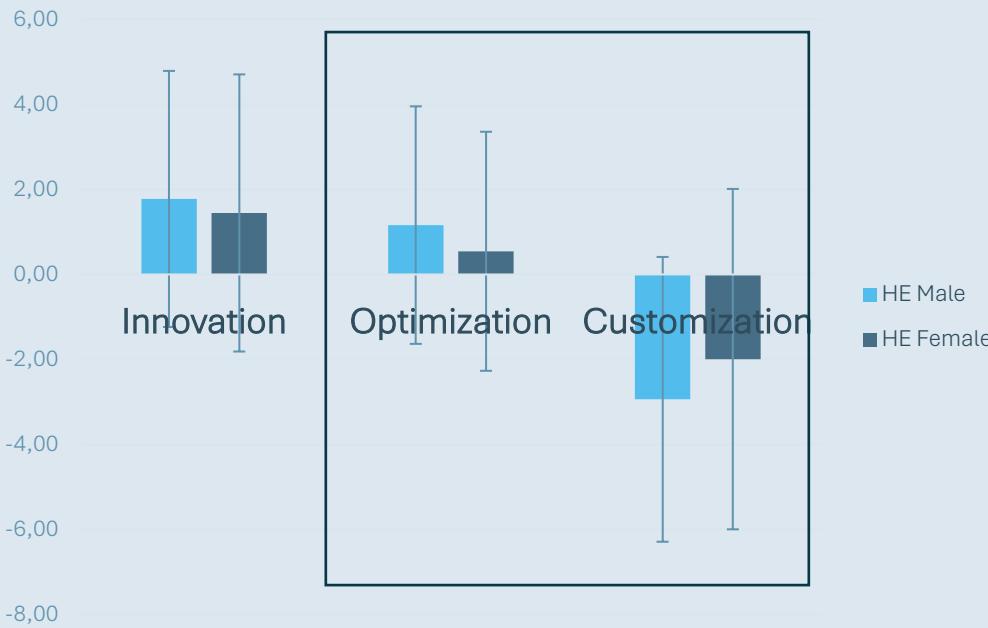

... and increase attractiveness and diversity in engineering

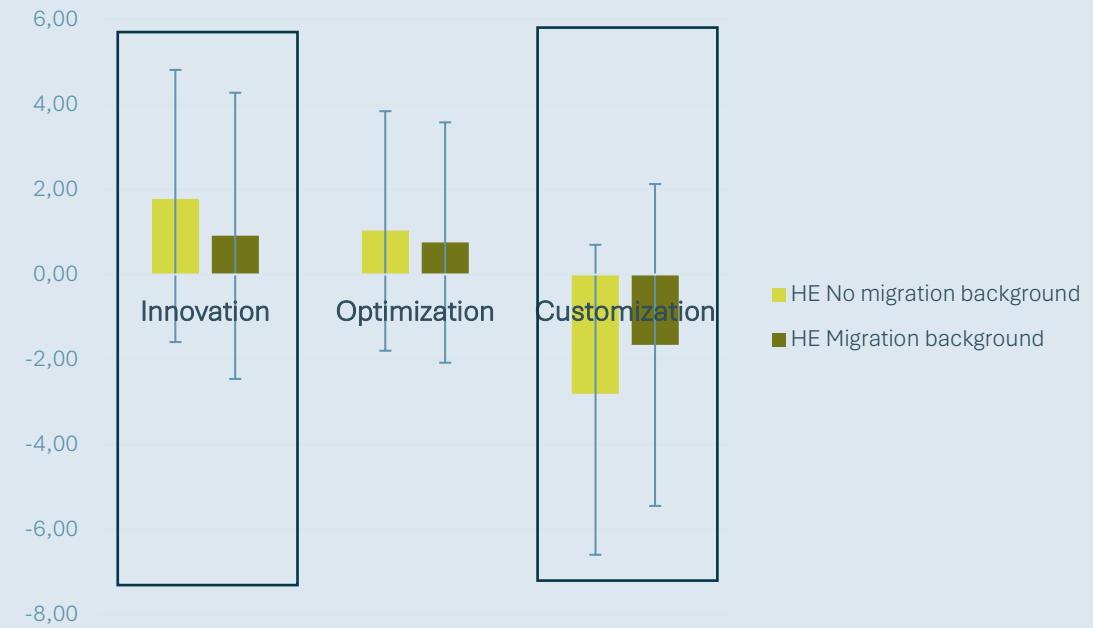

What did we notice?

Role preference can vary per gender or background

Role preference by sex (N=802)

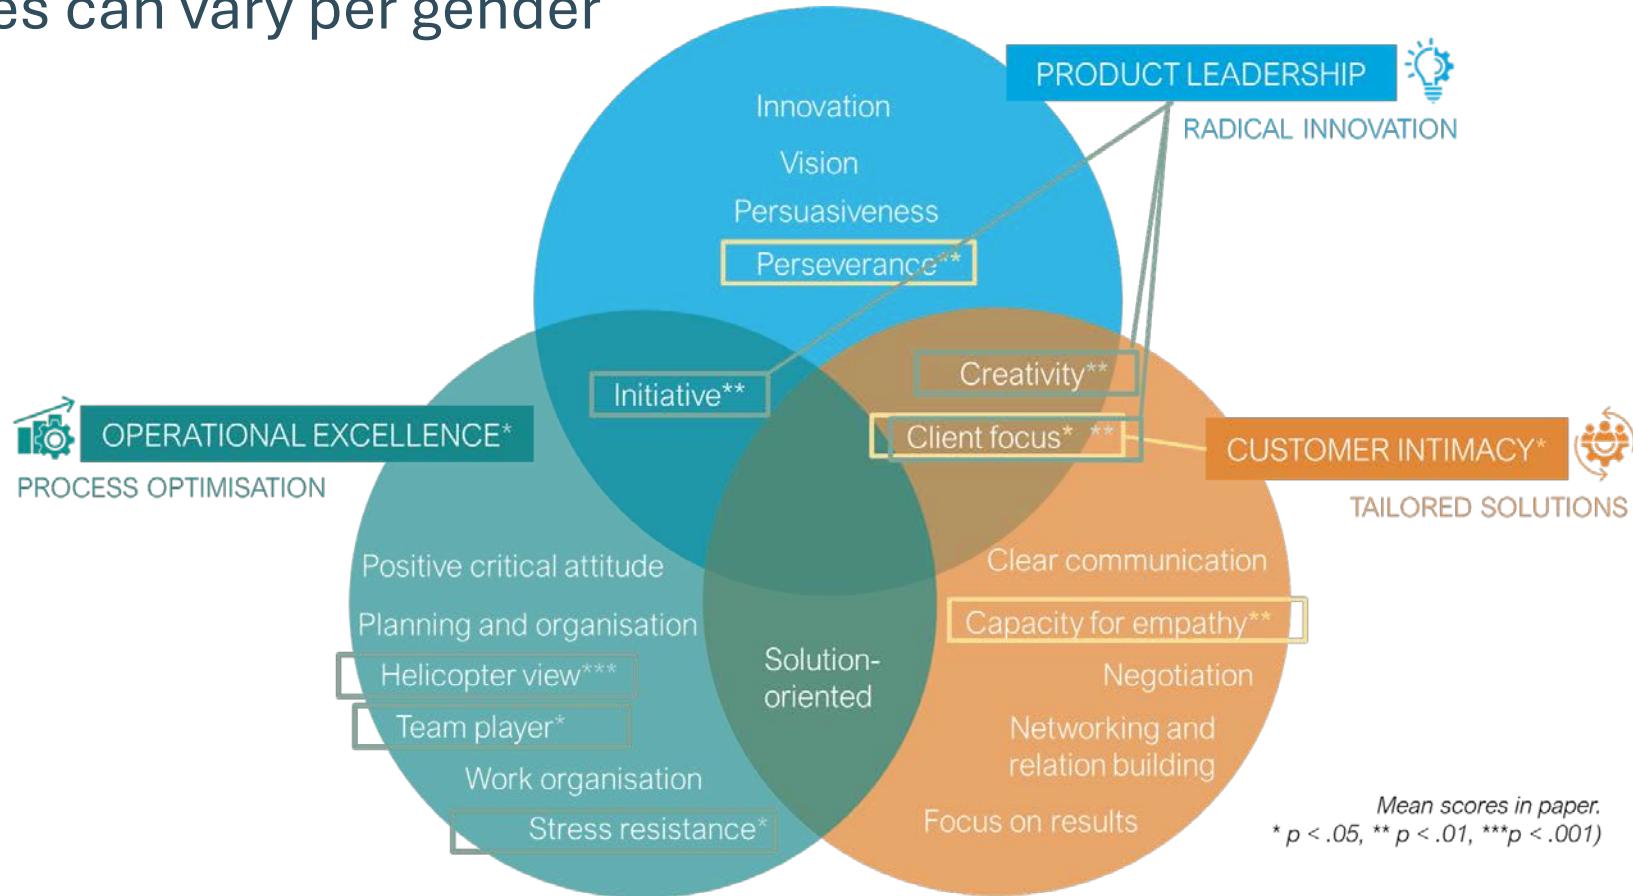

Role preference by background (N=802)

(Craps et al., 2023)

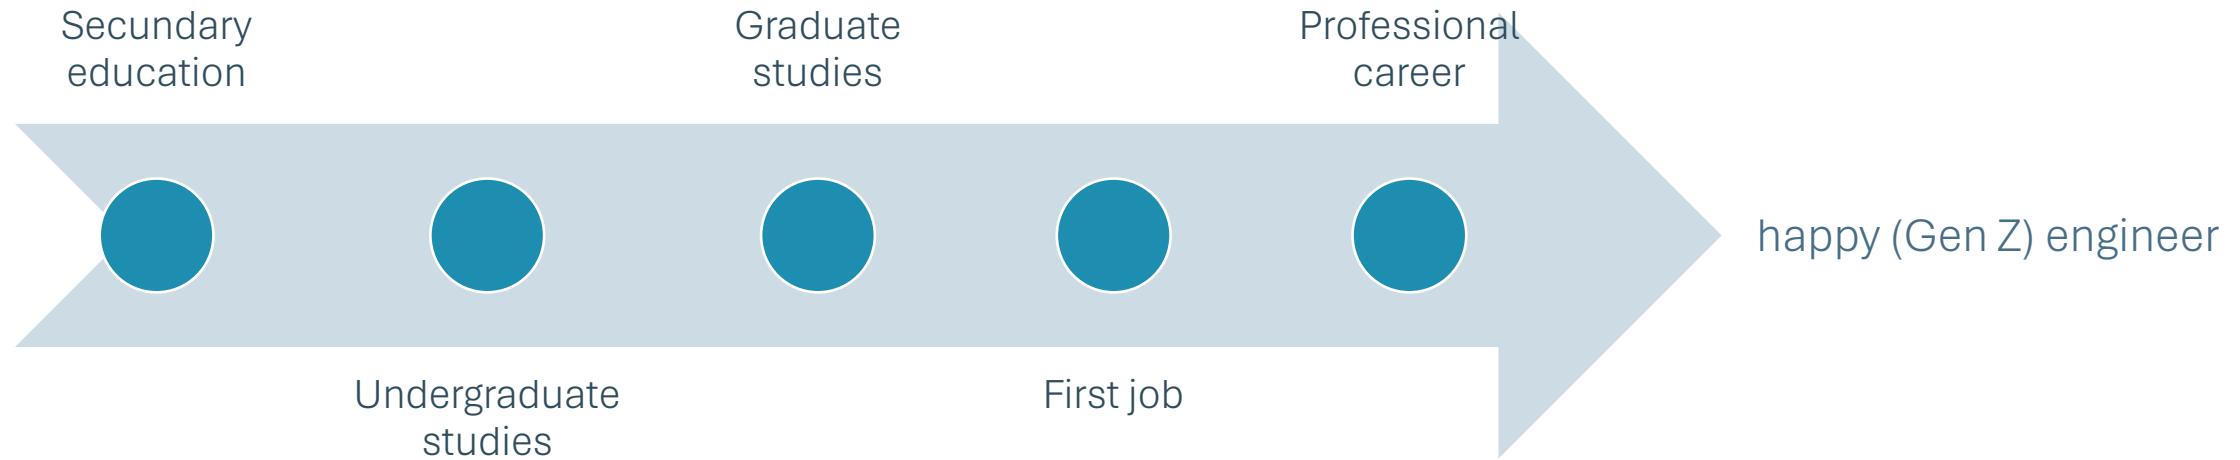

What did we notice

Competencies can vary per gender

(Craps et al., 2024)

Identity to increase attractiveness and retention

Study choice tools

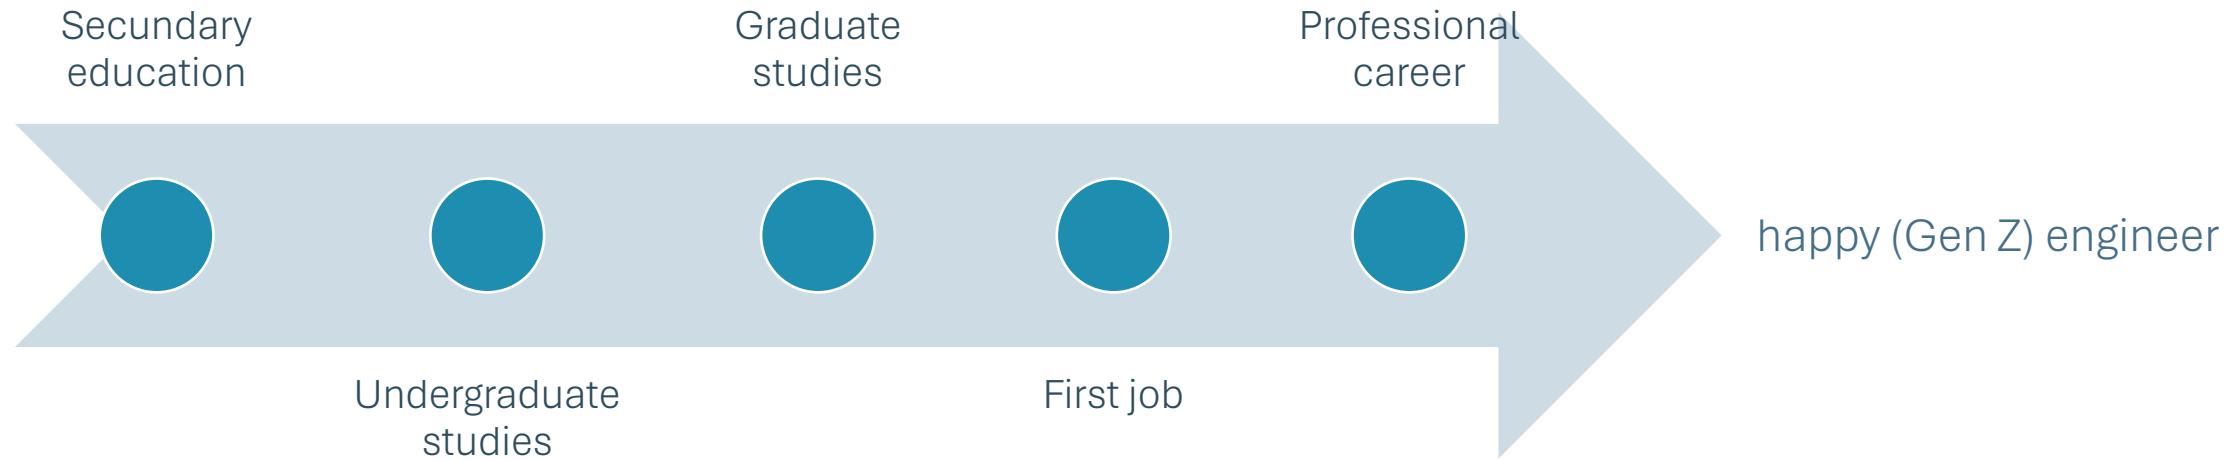

PREFER Explore SE & Toolbox Engineer,
more than meets the eye

Break down stereotypes and creating awareness of

- the diverse set of career possibilities within engineering
- the societal impact an engineer can have

PREFER to increase attractiveness and retention

Study choice tools

Inclusive education

Support educators in

- designing their courses for all
- supporting students' personal development (via e-portfolio)

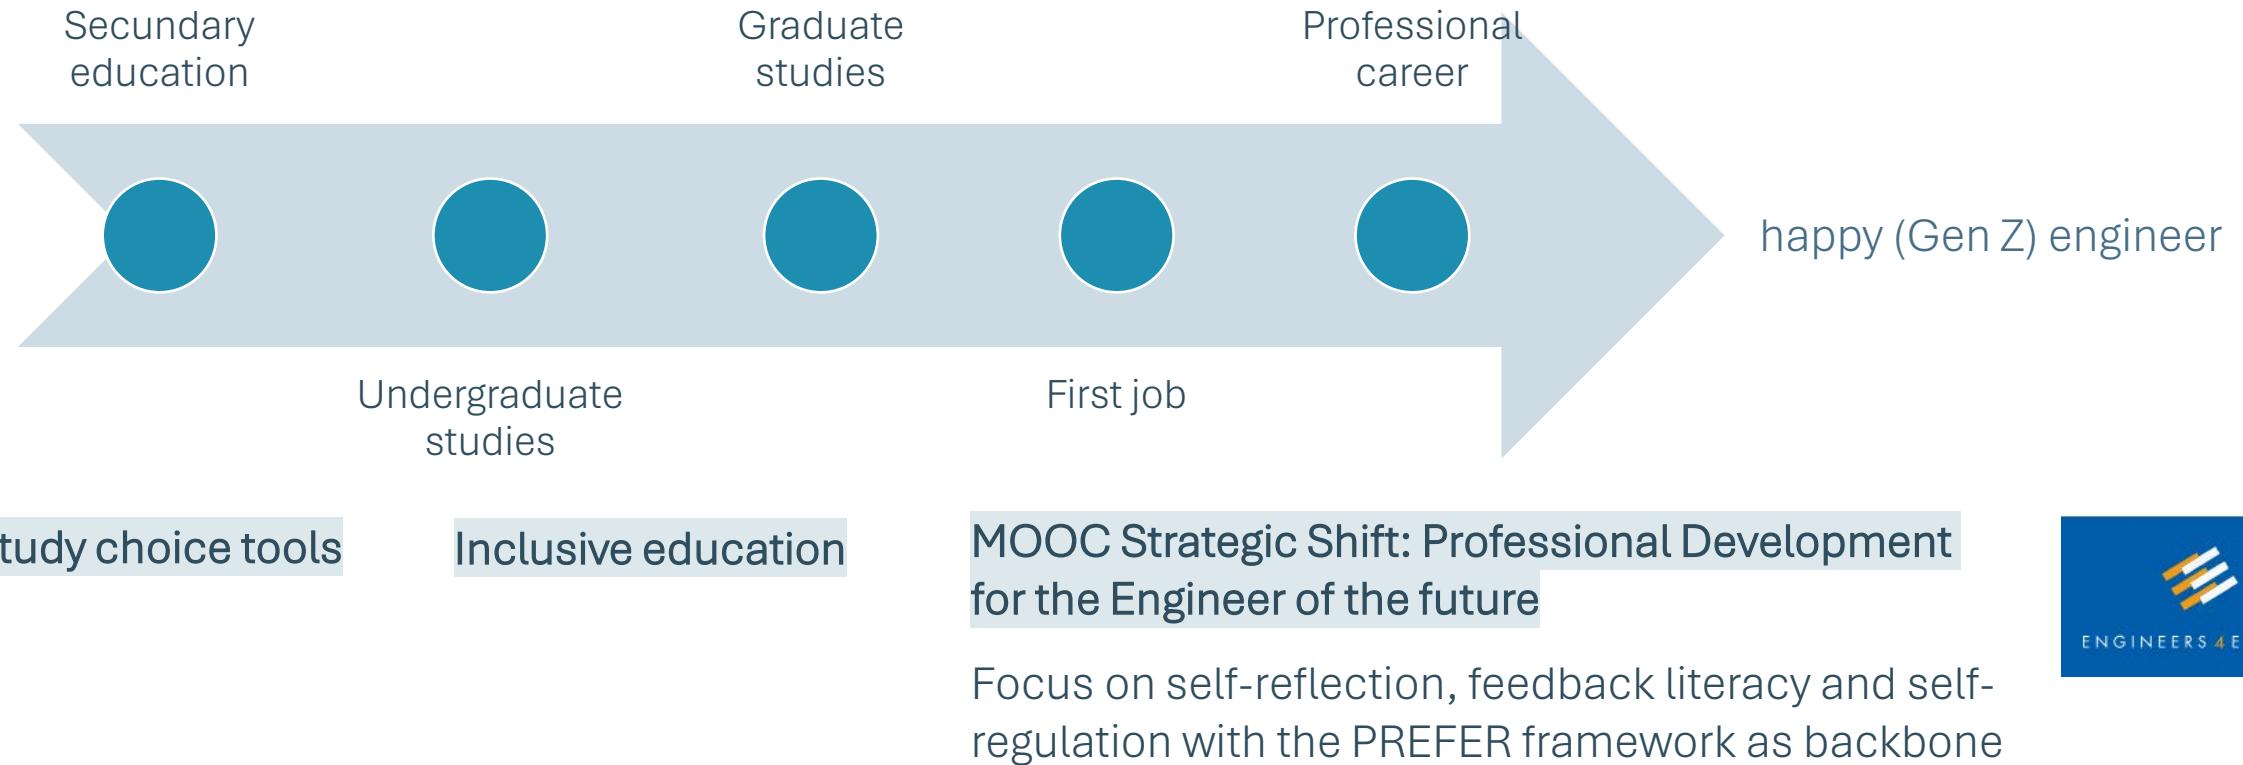

Towards inclusive
learning environments
IN ENGINEERING EDUCATION

TRAINeng PDP

PREFER to increase attractiveness and retention

Thank you!
